

Our focus this week:- We will be learning about collaging in our art and craft areas. We will be talking about keeping healthy and eating healthy foods including eating a balanced diet.

Maths:- We will be adding two groups of objects. We will be using the arm signals to show the addition symbol and the equal symbol. We will be modelling how to record our calculations pictorially and with numbers. We will be using our careful counting fingers to count objects and group them all together.

Literacy:- We will be sharing and discussing fiction and non fiction books. We will be learning about dictionairies and how to us them. We will continue to use our role play and small world areas for writing opportunities.

Phonics:- In phonics this week we are continuing to revise phase 3, revising the trigraph **igh** and the digraphs **oa, oo, ar, or**. We will continue to revise the tricky words: **I, go, to, no, the, he, she, we, be, you, are, was, my, they, her, all**.

At home you could:- Encourage your child to spot digraphs and tricky words in books that you share.

Reading Books:- Children are encouraged to read their reading books more than once to encourage fluency. We aim to change reading books twice a week. If you have shared the book with your child please make sure that you have signed the reading record so that we know and we can change your child's book.

Mother's Day: - Mums, Aunties or Grandmas (one person per child) are invited to join us for a Mothers Day Cream Tea on Tuesday 26th March from 2:15pm. The children will be preparing scones to share with you during the afternoon.

Thank you
The Reception Team
